Objective:

- Seeking a Web Developer position to leverage my skills in crafting dynamic and efficient web applications, while concurrently acquiring valuable experience and driving the company's progress.

Skills:

- Programming Languages: JavaScript, Python, HTML5, CSS3.
- Frameworks and Libraries: ReactJs, ExpressJs, Django, GraphQL, Prisma, Tailwind CSS, MaterialUI, Bootstrap.
- Databases: MySQL, PostgreSQL, SQLiteDB
- Version Control: Git

Experience:

Full Stack Web Developer Intern, Solar Secure Solutions-Karnataka, India. [May 2024-OnGoing]
E-commerce website(Food Industry):

- Created a fully functional e-commerce website using HTML, CSS, Bootstrap, and ExpressJS.
- Built a dynamic cart and checkout process for managing product quantities.
- Integrated PayPal as a secure payment gateway for seamless transactions.

Web Development Intern, Code Clause Pvt Ltd-Maharashtra, India. [April 2024-May 2024]

Video Streaming:

- Designed and implemented a responsive video streaming platform using ReactJs, Django, and Material UI.
- Users can upload their videos and set them as private or public.
- Created a robust and efficient backend using Django Rest Framework to handle user authentication and requests.
- Ensured responsiveness across various devices for seamless user experience.

Memory Game:

- Developed an engaging Memory Game using React and Material UI.
- Implemented a multiplayer feature, allowing two players to compete head-to-head in memory challenges.
- Incorporated a timer feature to add an extra layer of excitement and challenge, encouraging players to strategize and act swiftly.
- **Live Demo :** <https://memory-gameplay.vercel.app/>

Blog:

- Crafted an immersive blog website using React, Material UI, and Django Rest Framework.
- Incorporated user authentication, ensuring only authenticated users can access full articles, enhancing privacy and security.
- Enabled user comments for interactive engagement.
- Implemented category-based differentiation for articles, allowing users to explore diverse topics effortlessly and enhancing content discoverability.

Projects:

LeaderBoard:

- Developed a dynamic LeaderBoard website using ReactJS and Redux.
- Implemented a responsive user interface to ensure viewing across various devices.
- Implemented a feature that automatically scrolls to and highlights the new entry's position ensuring users can immediately see their ranking.
- **Live Demo :** <https://leaderboard-ten-flame.vercel.app/>

Ticket Booking:

- Developed a responsive movie ticket booking website using ReactJs, Django, and Bootstrap.
- Built a robust and efficient backend with Django to handle user requests.
- Implemented user authentication with Rest-Auth.
- Designed a state management system using Redux to track seat availability, seat selections, and booking progress.
- **Live Demo :** easy-ticket-booking.vercel.app

Rental Listing Website:

- Designed and developed a web application using ReactJS for the frontend and Django for the RESTful API backend.
- Implemented a role-based login system for both tenants and landlords.
- Tenants can search for available rental properties, and landlords can upload their properties.
- Employed Django to handle data and API requests, and implemented data validation and authentication.

E-commerce website:

- Built an e-commerce website using ReactJS, Django and Redux.
- Implemented a shopping cart, product search, and checkout process.
- Employed Django for managing data and handling user authentication using Rest Auth .
- Utilized Redux to manage the application state, which helped in maintaining the shopping cart data and user session data.
